

CRYO-DMSO-F

NK-T cells, CAR-T cells, Macrophage, MSC, iPSC, ES cells, specific high-end Chemically fully defined **DMSO free** cell freezing media

CRYO-DMSO-F, One of the best high-end DMSO free cell freezing media

Ready-to-use, Serum free, Protein free, Animal origin free,
DMSO free No antibiotics, No additives, chemically fully defined media
 Maintain long term cell storage at -80°C (Without LN₂ tank)
 Maintain good cell viability and functionality without **DMSO**

Guaranteed the all types of cells

Cell therapy NK-T cells, CAR-T, Macrophage
 Cord blood, Bone marrow, Hepatocyte, Epithelial, Immune cells
 Adult Stem cell (cord blood, bone marrow, Fat, Dental)
 Human ESC, iPSC, Skin fibroblast, Neuron cells
 Cell lines, CHO, HEK293T, Hela, MCF-7, etc.

Better or Equivalent Quality guaranteed than A, B (DMSO free), C (DMSO free) brand or any competitor's DMSO free cell freezing media

Primary Rat hepatocyte

Comparison test of cell viability after thaw with different type of freezing media as A, B, C (DMSO free) brand vs. CRYO-DMSO-F with Rat primary hepatocyte

After thaw 8hours 10x

Primary Rat hepatocyte

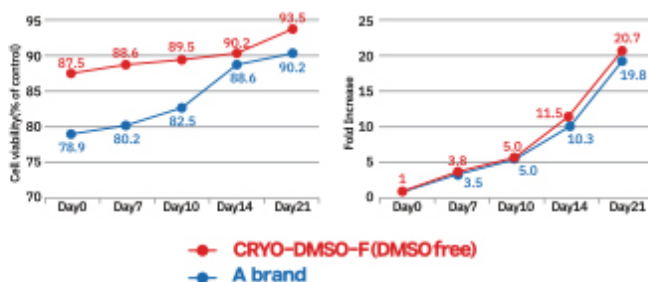

Comparison test of cell viability and plate ability after thaw by **CRYO-DMSO-F (DMSO free)** vs. A brand cell freezing media with Rat primary hepatocyte

After thaw 8hours

Human PBMC derived NK-T cell

Comparison test of cell freezing media such as A brand vs. DMSO free **CRYO-DMSO-F** with Human PBMC derived NK T cells

HEK 293T cells

Comparison of DMSO free commercial cell freezing media as A brand, B brand(DMSO free) vs. CRYO-DMSO-F (10005-01) with HEK-293T cells for 7day storage at -80°C freezer- 48 hours plating
